Full Thread Studs are used in all types of applications. They can be welded to a flat surface, or to the inside or outside of an angle.

Length: Length is listed before weld. Stud diameters 1/2" and below will be approx. 1/8" shorter after welding. 5/8" – 7/8" will be approx. 3/16" shorter after welding. 1" Diameter studs and above will be approx. 1/4" shorter after weld. TRU-WELD TT Studs can be made in any length above the standard minimum.

Material: Low carbon steel, ASTM A29 / A108, 1010-1020. TT Studs are also available in weldable stainless steel. Type 302 is the most commonly used. Other grades of stainless steel (except Type 303) are available when required.
